The graph displays the distribution of reads across a genomic region relative to a 3ss junction. The X-axis represents the position in base pairs (bp) from the 3ss junction, ranging from -500 to 75. The Y-axis represents the number of reads, ranging from 0 to 10. The data shows a baseline of low read counts (0-1 reads) for most positions, with several distinct peaks. The most prominent peak is at position 25 bp, reaching nearly 10 reads. Other significant peaks are observed at -300 bp (approx. 7 reads) and 50 bp (approx. 9 reads). Smaller peaks are also visible at -435 bp, -325 bp, -200 bp, -175 bp, -125 bp, and -75 bp.
